

# The Sign

Fractal Gates

Dark days  
Sanity gone  
Still it tries to drain my soul  
Am i the one insane?  
a call from above  
follow the delphian skies !

blood rains  
the birth of our fall  
fatality death (the) only observancy  
bow to your newborn gods  
follow the delphian skies !

it came out of the night  
out of the night  
to save me  
shivering my brain

bitter taste  
so many haunting cries  
rebellion

one day one night  
striving in the sunless skies

one way one might  
you are the chosen one

one day fighting it through my way to feel the prize of our true inception  
one night only one way to break the circle..... of their programmed extinction

Its the sign !

This bloody curse  
feeds my mind  
Still it seems to plague while its reaching by  
I'm hypnotised ?  
now I'm dead ?  
(its) the message  
follow the delphian skies !

I barely try  
so many die  
it came to quell from the nightside star  
how could this be while we learnt the liiies  
we are born to survive ?

it came out of the night  
out of the night  
to save me  
shivering my brain

bitter taste  
so many haunting cries  
so many haunting cries

one day one night  
striving in the sunless skies

one way one might  
you are the chosen one

one day fighting it through my way to feel the prize of our true inception  
one night only one way to break the circle..... of their nighttime raaaage

its the sign !

Dark ways
