That look on your face You're breathing at night I'm counting the days and the tears that I cry

You said that you love me Every word is a lie I wanted you near me And now it's goodbye

I'm feeling so deep
I'm feeling so wrong
You better believe me
That love's made me strong

The way you deceived me I've gotta move on Now that you're gone It's only...

Memory, memory, memory
It's all over the top now
Memory, memory, memory
And I need it to stop now

It's only...

Memory, memory, memory

It's all over the top now

Memory, memory, memory

And I need it to stop now

Oh yeah

A moment together
Is an hour alone
A change of direct
Means that I'm at fault

One second of hope
Is a week of regret
The curse of the mind
Is that it never forgets

I'm feeling so deep
I'm feeling so wrong
You better believe me
That love's made me strong

The way you deceived me I've gotta move on Now that you're gone It's only...

Memory, memory, memory
It's all over the top now
Memory, memory, memory
Tistend & Memory to to stop now
