

# River Out Of Eden

Frameshift

A stream it flows through time  
Without direction  
The current holds the line  
Abstract Instruction

The liquid of life, you and I

The banks are line with lies  
The future is inside  
It flows into a child  
A great divide

Blueprints passed down the line

River out of Eden  
Flow along through time  
Carry all that goes into a child  
River out of Eden  
Your waters drift apart  
You brought a new life, it came into this world

Channels forging their own way  
Progress never cease  
Information can create

An augmented beast  
Elements they test the young  
Who then will be released

After the trial of life  
Blueprints passed down the line

River out of Eden  
Flow along through time  
Carry all that goes into a child  
River out of Eden  
Your waters drift apart  
You brought a new life, it came into this world

River out of Eden  
Filled with what we are  
Keep on flowing far beyond this day  
River out of Eden  
Your waters drift apart  
Maybe sometime new life will find its way
