

Emily (It's Love)

Francesca Battistelli

Emily, I know you think it won't get any better
Life has gone and gotten so tough
Emily, you believe you will never ever
Never ever find that you're enough

Circumstances can change your mind
But time will help you see

It's love that hung the moon and stars for you above
And stays awake to start the morning
If you feel you've had enough
He's never given up
It's love

Emily, you will see some stormy weather
Dark and cloudy days of rain
But Emily, there will be summer laughter
'Cause everybody knows the seasons change

Circumstances will turn out fine
And time will help you see

It's love that hung the moon and stars for you above
And stays awake to start the morning
If you feel you've had enough
He's never given up
It's love

Can't you see
I know you believe me
Everything is whispering this well-known story
So listen in
It's humbling
All of this done for you

It's love that hung the moon and stars for you above
And stays awake to start the morning
If you feel you've had enough
He's never given up
It's love
