

# Driving In The Rain

Francis Dunnery

Everybody looking for the miracle girl  
To drive away the pain  
I could tell by your lack of affection  
You didn't want to ride with me again

And everybody looking for someone to love  
Don't wanna end up alone  
But in the heat of a vicious moment  
I took the car  
And babe I drove you home

And we'd talk about being a family  
And how all our children be raised  
But nothing really feels the same  
Guess I'll keep on  
Driving in the rain  
In the rain  
Driving in the rain

I got home and I lay on my bed  
And I wished that you would call  
I could smell you on my covers  
I could see your pretty picture on the wall

And all my friends came round and they partied all night  
Didn't seem like fun  
Cos every song they played on the radio  
Reminded me of the things we had done

And we talked about making a difference  
And talked about doing things right  
But nothing really feels the same  
Guess I'll keep on  
Driving in the rain  
In the rain  
Driving in the rain  
In the rain  
Driving in the rain  
In the rain  
Driving in the rain

You made me high  
High fly

Driving in the rain  
In the rain  
Driving in the rain  
In the rain  
Driving in the rain
