

Moonset

Franco

The moon sets and the lights grow dim
Feels so good to be alive
The moon sets and if you were here
We'd keep on burning the fire

But if the world's invisible
We cannot heal our own selves, well

The moon sets and the lights grow thin
Illuminate your desires
The moon sets and if you could see
The Holy and the Divine

But if the world's invisible
We cannot heal our own selves, well

Ride with me tonight
We'll try to find our own zen
Like an afternoon delight
Ride with me tonight
We'll find our own zen, well

I'll be fine, love
I'll be fine with your love
We'll be fine with Jah love
We'll be fine

With the next generation stand up tonight
Will the next generation stand up to fight
We the next generation we will make it alright
Will the next generation unite

This is our time, we're making it final
This is our time, b true and sincere
This is our time, to finally heal our own selves, well
