Every Time I Go Around Here

Frank Black

Every time I go around here I see tumbles Gone is the Regal automobile And ever since I'm down, I'm down We used to ride in it In this frozen town Any time we had, in the time we had We found, we found In some frozen place Parked half off the ground Every time I go around here I see tumbles through my head And the glass cleared And the motor rumbled I don't know if it's good That they did make the wheel But ever since I know, I know I've been rolling on Rolling on to you Any time we have, in the time we have We'll go, we go To that frozen place Frozen place that we knew Every time I go around here I see tumbles through my head And the glass cleared And the motor rumbled
