

## Places Named After Numbers

Frank Black

Beyond below above  
A gravity that slumbers  
At the center of  
Places named after numbers  
Different kind of love  
She was right  
She was right there  
She was right there all the time  
Collapsing all the way  
And though it seems from here  
That she was never there  
Light beams disappear  
Into her blackened hair  
I wonder if they reappear  
She was right  
She was right there  
She was right there all the time  
Collapsing all the way
