

The cloud so big and dark  
Foams up around my heart  
The pointed arms of trees  
Saying "this is where the cloud is"

Road wet with yellow lines  
And shadows of cars and planes

It's been forever but it's whatever  
I'm here for you and I would never  
Forget you  
Forget you

You are the best but your will is less  
Strong than the rest so you just rest  
We go together like cymbal and snare  
Held back and thrust together again

It's miraculous that humans are here  
We built ourselves or god is real  
And we ended up with eyes and ears  
And dreams and science and love and fears

I'm crying here in the backseat  
Our home is far away, empty

And you love me  
And you love me  
And love is a miracle  
Cause life's a dream

Prada red and Matisse blue  
Far yet, close together like me and you

I'm almost there (I'm almost there)  
I'm almost there (I wanna go back)  
I wanna go back (I'm almost there)  
I wanna go back (I wanna go back)  
Where can you put yourself that makes sense (I'm almost there)  
I'm worried that I might forget (I wanna go back)  
I'm almost there (I'm almost there)  
I'm almost there (I wanna go back)  
I wanna go back (I'm almost there)  
I want to go back (I wanna go back)

If I had a choice  
I'd listen to your voice  
All day while I'm gone  
Telescope straight to your song
