Just Can't Say It's Love

Girl you been kicking it with me constantly, for a while You just can't wait to hear those three little words Come from my mouth, yea yea yea

I just can't tell you Or find the words for The way I feel about'cha I just can't be without'cha I wanna say it so bad but something keeps telling me no Contemplating, still debating Should I just let it go

I just can't say it's love But you already know what's up I really can't put into words Baby you got to feel me And I hope you can hear me It's only you I'm thinkin of But still I just can't say it's love

You probably think I'm runnin game But that ain't the case, I'm just not sure See I've made that mistake before Don't wanna hurt no more, babe I wanna take my time with you, yea

I just can't tell you Or find the words for The way I feel about'cha I just can't be without'cha I wanna say it so bad but something keeps telling me no Contemplating, still debating Should I just let it go

I just can't say it's love But you already know what's up I really can't put into words Baby you got to feel me And I hope you can hear me It's only you I'm thinkin of But still I just can't say it's love

No matter if I wait This still could be fate Girl I get so frustrated My mind, my heart can't take it Just like the sun had the moon Baby I want you But I just can't say I love you
