## Captain

## Frankmusik

Faithful love abandoned Search for land we're stranded Storms are slowly moving in Feel the sun is setting No point in regretting We might make it on our own Cause' we used to know our way back home We had a lighthouse But will we know which way to turn With all the lights out

I said whos gonna captain us I said whos gonna captain us I said whos gonna navigate

Through this hurricane

Sweeping over our fate You said you'd keep an eye on those rocks I said I'd keep an eye on those rocks We said we'd keep an eye on them

But we've broken up again Think we need a captain I thought we had it figured Holding onto triggers Stand off pointing at our heads You held your ground forever But you lost me not so clever You can drown alone I guess Cause' we used to know our way back home We had a lighthouse But will we know which way to turn With all the lights out I said whos gonna captain us I said whos gonna captain us I said whos gonna navigate Through this hurricane

Sweeping over our fate You said you'd keep an eye on those rocks I said I'd keep an eye on those rocks We said we'd keep an eye on them But we've broken up again Think we need a captain I see you sinking over everything we say and do Sos'in you're confessin' it ain't helpin Now we falter in the water I reach out to you Currents come I don't see you swimming I said whos gonna captain us I said whos gonna captain us I said whos gonna navigate Through this hurricane Sweeping over our fate I said whos gonna navigate us Whos gonna navigate us

I said whos gonna navigate Through this hurricane Sweeping over our fate Captain Captain Captain Captain Captain Captain Captain Now we're breaking up again Now we're breaking up again Now we're breaking up again
