## **Don't Start**

## **Franz Ferdinand**

There's only wind and dust to follow Your footsteps on the run You know me, know when I'm without you I swear my heart burns in the sun

Baby, don't start walking away Stop walking away Start coming around and around again

I see you in your glasses clearly Your shades are blinding me, I say I miss you most when you are with me I miss your missing me each day

Baby, don't start walking away Stop walking away Start coming around and around again
