## How Long Has It Been

## Freddie Hart

Saw you there on the barstool as I walked in And the look we gave each other said we both need a friend Is this the first time you've come here in all the nights you'v e been alone Just searching for something that just wasn't at home How long has it been when's the last time he kissed you My you sure look lovely in that dress so tight and thin There's a look in your eye that cries somebody love me And I wonder how long has it been I sat down at your table and we shared a drink or two And all the things that first look told me now I find are reall y true Someone's neglect has left an emptiness where love used to be Then you reached out and touched my hand softly whispered to me How long has it been when's the last time she held you Made you feel wanted needed and loved

There's a look in your eyes that cries somebody love me And I wonder how long has it been
