Fire and Water

Every single day, I got a heartache comin' my way I don't wanna say goodbye Baby but look at the tears in my eye I don't wanna say goodbye Mama but look at the way you made me cry Every way that's nice You show you've got a heart that's made of ice

and I know

Fire and water must have made you their daughter You've got what it takes, to make a poor man's heart break A poor mans heart break

Baby you turn me on But as quick as a flash your love is gone Baby I'm gonna leave you now But I'm gonna try to make you grieve somehow

Fire and water must have made you their daughter You've got what it takes to make a poor man's heart break A poor man's heart break And my heart is breakin' too

(ahh yeah)

(alright)

I don't wanna say goodbye baby But look at the tears you made me cry Every way that's nice You show you've got a heart that's made of ice And I know

Fire and water must have made you their daughter You've got what it takes to make a poor mans heart break

Fire, fire and water must have made you their daughter Baby you've got what it takes to make a poor man's heart break Heart break

Baby and my heart is breakin' ohh my heart is breakin' ohh listen
