

# Riders in the Sky

Freedom Call

I can see the worlds decline  
All turned to dust  
Our home is a fading light

Poisonous haze covers what's left behind  
Terminus, end of days

The saving above  
Is waiting for us  
Between all the stars  
A new realm is yours

Riders in the sky across the universe  
We've already reached the point of no return  
Riders in the sky flying through space and time  
To rise again beyond the horizon line

We chase the black holes  
And ride on solar flares  
Scanning that darkness day by day

To find a new born world  
In the outer space  
To give us life, to give us faith

We dive into the void  
To find another world  
Well safeguard our future  
To ascend once again

Riders in the sky across the universe  
We've already reached the point of no return  
Riders in the sky flying through space and time  
To rise again beyond the horizon line

Surrounded by cosmic and deadly radiation  
We hold on in a vacuum, we fight until the wire  
Imprisoned by coldness, waiting for our salvation  
Discovered star clusters, into the unknown we dive  
Darkness... is falling

Riders in the sky across the universe  
We've already reached the point of no return  
Riders in the sky flying through space and time  
To rise again beyond the horizon line  
Beyond the horizon line...horizon line
