You Get Me Lost

Freedy Johnston

Did I wake you up again Talking in my sleep Unfamiliar afternoon

We were out for a little while Voices from the street Sunlight in a rented room

I don't know how You get me lost Forgotten where I'm running from

I have found You get me lost And I don't care where we're going

I'll follow you to your cloud Or meet you underground Take me with you either way

What if we'd never met You lead me to forget What I was about to say

I'm turned around You get me lost Directions wrong, way unknown

I have found You get me lost And I don't care where we're going
