Got me feeling incredible Got control over me You got me feeling insatiable Feel the need to be seen

You got me feeling incredible Got control over me Got me feeling insatiable I just need to be seen

You got me feeling incredible Got control over me Got control over me

Take me to your party Take me through the ice and the streets Take me to the awesomeness And this is the night we'll be free

Take my hand, I'll follow Take me anywhere that you please Take me 'til tomorrow And this is the night we'll be free

Take me to the city Let me hear the crowds and the screams All the flashes, all that noise And this is the night we'll be free

Take me to the cosmos Take me to the place on the screen Dreaming of this moment And this is the night we'll be free

Something random is happening I hope that I am prepared Something's suddenly different There's nothing left to compare

Something random is happening Future perfect prepare Something's suddenly different There's nothing left to compare

Something random is happening I hope that I am prepared I hope that we are prepared
