

# Ride With The Wind

Freternia

They came on a cold winters night  
When the land was dressed in snow and ice  
Through a frozen landscape with snowcovered trees  
On horses as black as the darkest of night

Ride with the wind, children of the night

But something was different the stars didn't shine  
A long time had passed since they left their land  
Once so beautiful now such barren and cold  
"God why didn't you see"

They had been gone for so many years  
Now the landscape was dead and the birds didn't sing  
They looked at the sky once so alive  
Children of the stars, daughters of the moon

Blood must flow to pay this crime  
The hunt will go on 'til the end of time  
Ride with the wind o, children of the night  
Judgementday has come
