

# Show Me Lights

Friendly Fires

Sunset dyeing, I can't wait to see the life you lead  
Cold in darkness I dream of what you see, when you show it to me

Show me lights, show me how you built the city that you own  
Show me lights, show me how you make it glow  
Show me lights, show me how you built the city that you own  
Show me lights, show me how you make it glow

Take me back, take me back in the darkness (2x)

Late night driving, with every word you say  
You part the crowds in waves  
Cold horizon with every move you make  
Your hands shows me the way  
I feel your world and see the things that make you live  
I wanna feel your rush and taste the you best you give tonight  
Gotta make the most of this before they cut the lights  
Show me lights, don't throw it away

Show me lights, show me how you built the city that you own  
Show me lights, show me how you make it glow  
Show me lights, show me how you built the city that you own  
Show me lights, show me how you make it glow

Take me back, take me back in the darkness (4x)

I wanna feel your world and see the things that make you live  
I wanna feel your rush and taste the best you give tonight  
Gotta make the most of this before they cut the lights  
Show me lights, don't throw it away

Show me lights, show me how you built the city that you own  
Show me lights, show me how you make it glow  
Show me lights, show me how you built the city that you own  
Show me lights, show me how you make it glow

Show me lights (5x)

Take me back, take me back in the darkness (4x)
