Alexis Elixir

From Dawn To Fall

The things we love things we need Take my heart away

I am standing here in front of you now Take my heart as a gift I am saying sorry

The family we used to be
But I can't take them back
I just can't forgive myself
So sorry, please let us work it out

Sometimes we just forget the importance Of things we see every day But nothing lasts forever - face the truth [Things we love, things we need]
