

I believe what comes around goes around  
There's a time and a place it just makes sense  
To be a man where there's meaning in life  
There's a message to learn  
but everybody's concerned  
About my business, my actions, they're justified  
And if we say back off that means step aside  
'Cause would we do this to you  
what's your meaning of friend  
Or have you given it up I got your friend till the end

And I believe we should be over this  
But we always disagree  
I believe we learn from each other  
And I've had enough this time

I believe in fairness and good things come along  
To those who are aware of this  
So keep in mind when you're doing your thing  
That if it hurts someone it might just bring  
Bad karma, dilemmas, they're coming for you  
And you'll be giving it, giving it up  
Then you might learn your lesson  
Or maybe you won't, 'cause it's righteousness  
Selflessness and everything goes with this

And I believe we should be over this  
But we always disagree  
I believe we learn from each other  
And I've had enough this time

Is this who we are  
Have we come too far to tell  
If we'll always disagree
