

# I Can See the Sun

Fuel

A lonely ship sails out for open sea  
The winds from the sky was blue  
Set a course for opportunity far from unknown  
And even though their lives are all they see  
And all they think about is you  
A place around the lies and hopes and dreams  
Will come, they know

It's been too long since I've found love  
Let me raise you up from here  
Cause our love is more than all those lonely years  
Oh and I can see the sun in you

Take the time to look around, you'll see  
The images of all I create  
But lift you up and throw you on your knees  
Cause they know, they'll grow

Cause it's been too long since I've found love  
Let me raise you up from here  
Cause our love is more than all those lonely years  
Oh and I can see the sun in you

The time has come, there's none to waste  
Hearts beat better to take  
As I see this side away

It's been too long since I've found love  
Let me raise you up from here  
Cause our love is more than all those lonely years  
Oh and I can see the sun in you
