

## Most of All

Fuel

I see our stars tonight  
Do you recall that light  
Or do you ever think of me  
And in your world somewhere  
Do memories rip and tear  
The ones that always keep you hanging on  
To all that might have been

And I love you now  
And I hate you now  
And I miss you most of all  
All those times we laughed  
The scars that you left  
Still I miss you most of all

And by the water's side  
The tall grass where we lied  
The nights we cried ourselves to sleep  
Most Septembers now  
I break down somehow  
Remembering all we said  
And all those dreams we never got to see

And I love you now  
And I hate you now  
And did you ever find  
The star in your mind?  
Or do you miss me most of all?

Are you somewhere  
Without a care  
Or are you as alone as I  
Did you ever make it home

And I miss you most of all  
And I miss you now

And I love you now  
And I hate you now  
And I miss you most of all  
And did you ever find  
The star in your mind  
Or do you miss me most of all
