

The Sum Of All

Full Diesel

What was the turning point
That turned your way from path
Down to the anger and hate
Away from satisfying life

R: And you're playing the role of god
Wanna be the most shining star
But no, you're down, you're out, last call right now
The sum of all we despise

You got a nine inch nail in your head
You're waiting something better to become
As you're lying in a vibrated heart shaped bed
Finish line hasn't been crossed yet
You have the edge to play with the feds
To place more bet when should be running away
Danger takes beyond the distance
You're bad without assistance

R: And you're playing the role of god
Wanna be the most shining star
But no, you're down, you're out, last call right now
The sum of all we despise

So long, gotta go, move on

Repeat after me, oh yeah
Repeat after me, hell yeah

You wanna sink us all
Your cojones are too small
You wanna put us down but you're doing it too loud
You think you're doing it right
But you're shutting off your lights
Last round, Fucker

And you're playing the role of god
Wanna be the most shining star
And your playing the role of god
Wanna be the most shining star
But no you're down you're out
you're down you're out
you're down you're out last call
The sum of all...
