## **Download The Destruction**

I'll bless you with a smile Just come to understand your place here You're faceless

Take shelter for a while Underneath my wing of thorns and bile My child

It's all the same and you're back again And you're hoping You've been here before

You're not to blame but you're back again And you're coping Just drop to the floor

And please download my destruction

Check you're screen like a little sponge There's a good boy Thinking no more Run along and cry to mother

Find a way to be understood With a modem Strapped to the door Thinking was always underrated

And your square eyes Don't look so bad in this light The cancer only bothers you at night Dying slowly never looked so appealing Who needs scars When it's death you're cheating

You don't feel the time With curtains drawn You fall in love with girls You never saw Sitting in your filth don't feel so bad It's nothing, nothing

Now you're home with your feet up She's just a bore Better find a better boredom Take a shine to the little ones But it's money I need some more And I'd kill my neighbour To smell it once

## **Full Scale**
