

# It Gets Better

Fun.

What have we done, oh my god  
What have we done, oh my god

This is really happening  
You never looked so bored  
Can you feel my fingernails?  
They've never been so short

It's hard to lay a golden egg with everyone around  
It's hard to stay inside my head when words keep pouring out

Like starlight crashing through the room, we'll lose our feathers  
Yes, I know it hurts at first but it gets better

It gets better, it gets better  
It gets better, we'll get better

It gets better, it gets better  
It gets better, we'll get better

I can taste your summer sweat  
It's never been so warm  
So can we kick the covers off?  
They're always on  
It's never been so warm

It's hard to keep a straight face when I just want to smile  
If you could see the look that's in your eyes

Like starlight crashing through the room, we'll lose our feathers  
Yes, I know it hurts at first but it gets better

It gets better, it gets better  
It gets better, we'll get better

It gets better, it gets better  
It gets better, we'll get better

There's a fire in sky  
Some snow on the ground  
Not quite enough cigarettes  
To calm me down

What have we done, oh my god  
What have we done, oh my god

It gets better, it gets better  
It gets better, we'll get better

It gets better, it gets better  
It gets better, we'll get better

(This is really happening)  
It gets better, it gets better  
It gets better, we'll get better

(This is really happening)

It gets better, it gets better  
It gets better, we'll get better
