

## Inequality

### Funeral for a Friend

We put the power in the hands of the wealthy  
Elitist thinking they know what's best for us  
Not knowing, not knowing right from wrong  
Just taking and never giving back

R: They stole what we gave and feathered their own nests  
So while we die, they multiply  
The symptoms of bigger problems  
A distraction of our new world order meltdown  
Everybody thinks they've got the answers  
When there's only one

Dumbing down as the race begins to falter  
New generations of a mindless order

R:

We run around like headless chickens  
Blame each other, blame the others

R:
