Adventures Misadventures

Funeral Suits

We all know that lie We all know that lie

We all know that lie Buried in the ground Dug beneath our hearts To surface in the sounds

And we all know that lie I want to say that I've been followed Lay at night when it gets dark First the shakes and then the horror As the dagger strikes my heart

We all know that lie And we all know that lie And we all know that lie

We all know that lie Buried in the ground Dug beneath our hearts To surface in the sounds

And we all know that lie I want to find a love less hollow I want to say that I can't die I want to say I feel no sorrow But this is all a lie

And we all know that lie And we all know that lie We all know that lie

We are all as one We are all as one We are all as one

We all know that lie We all know that lie We all know that lie
