

Fire and forget

Funker Vogt

Killing never was easier
That it's today
There's no more need to hone your skill
You fire and forget

All these laser-guided bombs
Will soon become out-dated
There's no more need for guidance
Just fire - fire and forget!

Forget the bombs forget the victims
Just fire - fire and forget
Forget all ethics forget all morals
Just fire - fire and forget - fire and forget

Now they call it a smart bomb
It takes over thinking
No more smart guys will be needed to fire and forget
The target's locked
Can't be erased
Fire!

Forget the bombs forget the victims
Just fire - fire and forget
Forget all ethics forget all morals
Just fire - fire and forget - fire and forget
