## **Starfighters**

## **Funker Vogt**

A dream finally came true To wear this special uniform To join in their company The best of the best

Always been a believer
In your own capacity
The training never was too hard
No one could break you

Reach out for the stars Your strong will got you here You walked a stony way Without the slightest sign of fear

We're starfighters, fly all day and all night And all that we see is our cockpit light We're starfighters and we love it so much It's our obsession, we have the master's touch

It was an everlasting dream
The last thing you wish to see:
Flying into a supernova
While you are going down
