

Things that we should say

Future of Forestry

Time with you and time once had
Passed between my hands
The memories we can feel them fade
Like circles in the sand

A thousand thoughts, a thousand dreams
Lost within the day
A thousand ways for souls to touch
The things that we should say
The things that we should say

It's been a cold bitter night
Maybe it could be a while
'Til the sun and the sky light the way
I'll bring you close, you could stay
Before our time has gone away
We should say the things that we should say

Tendencies and weaknesses
They make me who I am
I'm falling through the cracks and turns
Of circles in the sand

It's not lost when your love is near
Don't let this world turn grey
The dreams of hope and lips that heal
The things that we should say
The things that we should say

It's been a cold bitter night
Maybe it could be a while
'Til the sun and the sky light the way
I'll bring you close, you could stay
Before our time has gone away
We should say

It's been a cold bitter night
Maybe it could be a while
'Til the sun and the sky light the way
I'll hold you close, would you stay?
Before our time has gone away
We should say the things that we should say
