

## Things that we should say

### Future of Forestry

Time with you and time once had  
Passed between my hands  
The memories we can feel them fade  
Like circles in the sand

A thousand thoughts, a thousand dreams  
Lost within the day  
A thousand ways for souls to touch  
The things that we should say  
The things that we should say

It's been a cold bitter night  
Maybe it could be a while  
'Til the sun and the sky light the way  
I'll bring you close, you could stay  
Before our time has gone away  
We should say the things that we should say

Tendencies and weaknesses  
They make me who I am  
I'm falling through the cracks and turns  
Of circles in the sand

It's not lost when your love is near  
Don't let this world turn grey  
The dreams of hope and lips that heal  
The things that we should say  
The things that we should say

It's been a cold bitter night  
Maybe it could be a while  
'Til the sun and the sky light the way  
I'll bring you close, you could stay  
Before our time has gone away  
We should say

It's been a cold bitter night  
Maybe it could be a while  
'Til the sun and the sky light the way  
I'll hold you close, would you stay?  
Before our time has gone away  
We should say the things that we should say
