

Would you come home?

Future of Forestry

I don't know this time
Lost my way 'round here
So our seasons changed
Is love a souvenir?

The way the codes were found
I don't understand
What to make of us
What to make of us

When you go, you don't
And when you stay your sky away from here
Would you come home?
Would you come home?

And when you go, you don't
And when you're still, you're restless in my soul
So would you come home?
Would you come home?

And our memories pass
We feel the push and pull
As the years move on
The change is beautiful

And love is bittersweet
And you and I, we decide
What to make of us
What to make of us

When you go, you don't
And when you stay your sky away from here
Would you come home?
Would you come home?

And when you go, you don't
And when you're still, you're restless in my soul
So would you come home?
Would you come home?

We'll see the world again
See the world again

When you go, you don't
And when you stay your sky away from here
Would you come home?
Would you come home?

And when you go, you don't
And when you're still, you're restless in my soul
So would you come home?
Would you come home?

And when you go, you don't
And when you're still, you're restless in my soul
So would you come home?
Would you come home?
