

# The Future is Now

Future

The city's made of diamonds  
And tomorrow glass will grow  
All the freedoms that divide us  
They're coming after me  
Flashback 1984  
Now who's knock, knocking at your door  
A thought that starts a riot  
They're coming after me

Now, life is not the same  
I am one, but sparks turn into flames

Will you take what's in my head  
And erase me when I'm dead  
Cause the future is now  
Now I'm disappearing  
The day has turned to night  
Can you save me from the light?  
Cause the future is here  
This is how I disappear

Running down a spiral  
With the light of better men  
Shouting progress is survival  
Take one last look and see me

Now you see me, now you don't  
No valid break, no string of hope  
My hero your pariah  
They're coming after me

Now life is just God's game  
I am one  
But sparks turn into flames

And you get what you deserve  
When revenge is what you serve  
Cause the future is now  
Now I'm disappearing  
I sink into the night  
And I'm turning off the lights

Cause the future is here  
This is how I disappear

So the end's when you make that  
And that's what your looking for

This is the future  
Future is now

Disappear  
Disappear  
I disappear  
Disappear

Now turn off the lights

The skys are blue inside you  
Turn off the lights  
They'll get inside of you

Will you take what's in my head  
And erase me when I'm dead  
Cause the future is now  
Now I'm disappearing  
The day has turned to night  
Can you save me from the light?  
Cause the future is here  
This is how I disappear

Disappear  
Disappear  
Disappear
