

## Inside The Storm

Gaia Epicus

Hear the thunder, see the lightning  
Feel the rain comes poring down  
Hear my heart beat, see my anger  
Feel the force that strikes you down

You've betrayed me, for the last time  
Now you must pay for your sins  
Kneel before me, say you're sorry  
Close your eyes and feel the pain

I am trapped again

Inside the storm  
We can fly away to the unknown  
If you're cold, I'll keep you warm  
You are safe inside the storm

See the moonlight, hear the voices  
You can hear them calling you  
Cannot answer, life is fading  
There is nothing you can do

Someone's crying, someone's trying  
To keep the life in you  
Now you're sorry, but it's too late  
This is the end for you

I am trapped again

Inside the storm  
We can fly away to the unknown  
If you're cold, I'll keep you warm  
You are safe inside the storm

Inside the storm  
We can fly away to the unknown  
If you're cold, I'll keep you warm  
You are safe inside  
You will join the ride  
You are safe inside the storm
