

## Forever Tonight

Galantis

Let me call love blind tonight with possibility  
Set your teenage love alive, won't you follow me?  
Blowing fire in the sky, burning evergreen  
Before the sun is in your eyes, run away with me

Forever, our night is guided by lights  
Together, we are one  
Together, we are one  
We'll have forever tonight, forever together, forever  
We'll have forever tonight, forever  
We'll have forever tonight, forever

Let me call love blind tonight with impidity  
We'll be one 'til we collide, with no in between  
Lighting up fires, burning evergreen  
You can love me back to life, every time we see

Forever, our night is guided by lights  
Together, we are one  
Together, we are one  
We'll have forever tonight, forever together, forever  
We'll have forever tonight, forever together, forever  
We'll have forever tonight, forever  
We'll have forever tonight, forever  
We'll have forever tonight, tonight
