## The end

## **Gallows End**

I feel the end, it's closing in It's just a feeling I have Maybe it's to late to wonder why Things went this way

And now I see the light in front of me This must be the end My life passes slowly before my eyes As I bid life farewell

Have no regrets for the things I've done 'cause this is what I believe
I will not kneel or crawl for you
So just get out of my way, get out of my way

And now I see the light in front of me This must be the end My life passes slowly before my eyes As I bid life farewell

And now I see the light in front of me This must be the end My life passes slowly before my eyes As I bid life farewell
