Still Loving You

Galneryus

Wonder why you left on that night Wonder what you thought at that time What can I do? Have I lost you? What should I do? Have I lost you?

The season passes early for me Something is lost from my body Crazy about you Love you from my heart Still loving you Love you from my heart

I regret my very happy days Memories are fading away I feel the night and days Somebody said "You must forget" (But) I can not do yet It's cold in my bed

Oh there is no woman meant more than you I wanna meet wanna touch Do you hear this prayer of me? I thought that love with you was forever I miss you We'll surely meet in the future I don't know where and with whom you live now It is not in my mind Now all of you are not mine I thought that love with you was forever I miss you We'll surely meet in the future

And I wish this pain would go There is your shadow Somebody said "You must forget" (But) I can not do yet It's cold in my bed

Oh there is no woman meant more than you I wanna meet wanna touch Do you hear this prayer of me? I thought that love with you was forever I miss you We'll surely meet in the future I don't know where and with whom you live now It is not in my mind Now all of you are not mine I thought that love with you was forever I miss you We'll surely meet in the future I'm so sad I wanna meet you in the future
