## **Fire Below**

Gamma Ray

Lead us not into temptation as we grow in fear Free your mind from all frustrations as they're drawing near Take your time, live in sin, choose your alibis Work all day, die in pain, you're a sacrifice They're gonna send you down to hell And put your body on a shelf This is the island of damnation, Where all your dreams are gonna fall Your mind is screaming for salvation And then your world is gonna blow Down in the fire below Below Silent tears are running down my face into the night As I'm getting closer to my heart that's full of fright They lead me down a steep hell spire And burn my body in the fire This is the island of damnation, Where all your dreams are gonna fall My mind is screaming for salvation My heart is torn apart and thrown Into the fire below Below They're gonna send you down to hell And put your body on a shelf This is the island of damnation, Where all your dreams are gonna fall My mind is screaming for salvation My heart is torn apart and thrown Into the fire below The fire below Go down, to nowhere, go down, down They take you to Hell Into the fire They're taking you down Into the fire The fire below
