Lost in the Future

Gamma Ray

Atomic fallout scans the sky
Another place where people die
And with a massive final punch
We left a world of pain

And now pollutions everywhere
Another death is in the air
A million people left alone
Down in their desperate, blackened homes

Tomorrow there'll be no sun
Hanging high up in the sky
Tomorrow all dead and gone
And I wish that I could fly

We are lost, in the future, we are lost
In a dream we can't control
No way
So tell me now computer god

We plug our lives into machines
And as they're guiding our dreams
We're individually lost
As we are nailed to our cross

Tomorrow there'll be a sun
Hanging high up in the sky
Tomorrow I'm dead and gone
Oh I wish that I could fly

We are lost, in the future, we are lost
It's a nightmare, we are lost
In the future, we are lost
In a dream we'll never see

Our hearts live forever
In dreams are alive
Forever and ever
We're riding the sky

All hope is lost, but nothing gained
We're crying again
Is this the end?
Lost, in the future, we are lost

It's a nightmare, we are lost
In the future, we are lost
In a dream we can't control
We're lost, so lost
We're lost, so lost
We all are lost!
