

# Miracle

Gamma Ray

I was walking through a misty day, the sky was cold and grey  
An old man came right up to me and said, "I know your name."  
He said he'd like to talk to me only for awhile  
I had no plans, so I said OK, and he started with a sigh and said:  
"I've seen a million years pass right away.  
I've seen the gods of yesterday, they're old and grey.  
If you will fail, there's only one more way."  
What we need right now, is a miracle on earth  
Let our hearts cry out, so our voices can be heard  
Let us walk away together, from the never ending rain  
'Til the sun will shine for all of us again.  
He said all life he'd been searchin' for a way to find the clue  
That love will turn the fear to hope, skies of grey to blue.  
"Let the miracle come true my friend", this is what he said  
"Let's give ourselves a second chance for another lap in the race.  
"And then a million stars will shine to light our way.  
And all the tears from yesterday, ... forever washed away."  
What we need right now, is a miracle on earth  
Let our hearts cry out, so our voices can be heard  
Let us walk away together, from the never ending rain  
'Til the sun will shine for all of us again.  
Take my hand and you will see the mirror of your destiny  
So many came to read the signs, to understand their meaning  
Now I see I do not dare, but something's calling me  
So many men cannot break free, the one who will succeed,  
I wonder if it's me  
What we need right now, is a miracle on earth  
Let our hearts cry out, so our voices can be heard  
Let us walk away together, from the never ending rain  
'Til the sun will shine for all of us again.  
It's a miracle we need  
Let hearts unite, so our voices shake the earth  
Let us walk away together from the never ending rain  
'Til the sun will shine for all of us again  
We need a miracle, a miracle, a miracle on earth  
Let our hearts cry out for the miracle  
Let the stars shine on  
For the miracle, the miracle on earth  
Our hearts, our hearts shall unite for the miracle
