I'm riding the wind, don't need your request You'd never invite me but I will be your guest Oh no, no don't be afraid of the reaper It's time to go I call your name and you follow Fly with me

Take a look around and say you love me And I will guide you through the golden door For everything you'll see there is a reason The big wheel is turning like always before

There is no return from the other side of heaven For the big wheel turns and the circle must go on forever more

How do you like your termination day? So far - Kiss me good bye, cause I must fade away

Oh no, no don't be afraid of your master
It's time to go it's calling your name now you follow
Fly away

Take a look around and say you love me
And I will guide you through the golden door
For everything you'll see there is a reason
The big wheel is turning like always before

There is no return from the other side of heaven For the big wheel turns and the circle must go on forever more

Welcome to eternal life, my friend Now take your seat on your cloud Enjoy your stay But always remember... There is no return

There is no return from the other side of heaven For the big wheel turns and the circle must go on forever more

There is no return from the other side of heaven For the big wheel turns and the circle must go on forever more
