

# The Landing

Gamma Ray

High in the machines  
Above the earth  
We observe your lifeform  
We've come for you

Riding the machines  
We'll take your souls  
Riding the machines

We've come to rule  
About 400,000 years ago  
When evolution was still on the make  
An extraterrestrial race  
Appeared in our part of the galaxy  
Heading straight to earth

Riding the machines  
We'll take your souls  
Riding the machines  
We've come for you

When they finally landed  
They found a planet with perfect survival conditions  
A lower lifeform called humans  
Considered them as gods  
From somewhere out of space
