

# The Silence

Gamma Ray

When you're drowning,  
when you're freezin',  
when you're feeling cold  
There's a light in the darkness  
as the elder always told.  
When the winter's coming closer  
and the autumn's passing by,  
Then the world will sink in silence  
and I think we all should try.  
Oh, I wanna live my life in a fairy tale  
Where the end is always good and never sad.  
Show me the way to another world  
Where the sun is always shining in the and  
And we fight back the tears, and we lose our fears,  
Let the world remain in silence for a while  
Sun in our minds in a world full of ice,  
Let the silence remain for a little while.

Somebody came and slammed the door,  
took the feelin' away from our hearts.  
And the horror took hold of a place  
in our hearts filled with love.

What is left behind the ice,  
behind the make up and the lies  
Tell me what goes on inside our minds,  
There is a hole in our sky,  
getting bigger, growing wide  
No more answer, but we hold the line  
See and hear what we have done to us all,  
we wanna be free more than anything,  
Do you hear what I say to you?  
We will make it through, the sun shall shine.

Hear the words we say and see the light of day  
We never will be free until the sun is shining for us all

Carry on, carry on and make our dreams come true  
And for a little while we stay together  
Carry on, carry on, may all our lovin' stay  
And for a little while we stay together, forever  
Together, forever.
