## **Dynamite**

## **Gareth Emery**

Watching the sky light fall to black Feeling like the lights never coming back, no When it's dark, and there's no one I will be here, I'll be here

And its all for you Every spark in every flame All for you And all the stars they know your name

Light a blazing light, ready to ignite We are made of dynamite Fireflies falling through the night We are made of dynamite

Light a blazing light, ready to ignite We are made of dynamite Fireflies falling through the night We are made of dynamite

Light a blazing light, ready to ignite We are made of dynamite Fireflies falling through the night We are made of dynamite

Blazing light We'll show Blazing light We'll show
