

Good Thing

Gareth Gates

I was looking for a new direction
you gotta keep moving for you're own protection
haven't got no love to stay in love (well well, ohhh)

you turn the tables on my whole world baby
you take away all the heartache that love gave me
cant you see what you've done in my life
and let that pure connection change my whole perception

you're the fuel in my fire,
my fever runs high
got me scared of desire
its a good thing

when we come together
you can stop this good thing
no you can put it out
when we come together
to try and stop this good thing
and it will burn you out

I'm kinda warming to this new sensation
cos everyday is like a revelation
just show me something like (I never knew about me)

my thoughts cant lead me into no temptation
cos baby you'll give me everything ill ever need
for you will make a fool out of me
ill just have to take it I will never have to fake it

there's a fuel in my fire
my fever burns high
when I'm scared of desire
its a good thing

when we come together
you can stop this good thing
no you can put it out
when we come together
to try and stop this good thing
and it will burn you out

girl you got me burning up, got me burning burning up.
and I don't know how to stop got me burning, burning up.
girl you got me burning up, got me burning burning up.
and I don't know how to stop burning up, burning up
girl you got me burning up, got me burning burning up.
and I don't know how to stop got me burning, burning up.
girl you got me burning up, got me burning burning up.
and I don't know how to stop burning up, burning up

there's a fuel in my fire
and its taking us high
I'm not scared of desire
its a good thing

when we come together

you can stop this good thing
no you can put it out
when we come together
to try and stop this good thing
and it will burn you out
when we come together
you can stop this good thing
no you can put it out
when we come together
to try and stop this good thing
and it will burn you down
