

Since I Saw You Last

Gary Barlow

1. They took my voice
Erased my past
With all that noise
It couldn't last

2. With words so cruel
I washed my face
Hoped one day
I'd wake up in a better place

R: Today I took back what was stolen
And gave new life to what was frozen
One mouth talking
A dead man walking
A thousand faces watched me falling

I've made my peace with what may happen
Accepted I won't be in fashion
Oh you gave, I got it
Yeh you gave, I got it all back
Since I saw you last

3. When brothers land
And take what's good
You can win a war
Oh, and she'd no blood

4. Everybody plays their part
Oh we let the haters hate
While everybody's losing heart
Lying in the longest grass I sit and wait

R: Today I took back what was stolen...

I've made my peace with what may happen...

5. I know you heard
My shout for help
For those who stood and watched
Go fuck yourself

6. I know you heard my cry for help
I know you heard I was going through hell
I know you heard I was losing my mind
I know you heard it was a matter of time

*: I know you heard...
I know you heard...
I know you heard...
I know you heard...
