## Made To Love You

## **Gary Wright**

Now, I don't need to travel far And I don't need to be a star I don't need no one, to tell me if I'm right You're the only one that matters in my life

I was made to love you Love you, love you alone Yes, I was made to love you Love you, love you alone

I don't think I can pretend, no Cause baby, you're more than just a friend We grew up together, living separate lives Now, we need each other, what a big surprise

I was made to love you Love you, love you alone Yes, I was made to love you Love you, love you alone

Love you, love you Love you, love you alone I was made to love

Behind my dreams are thoughts and feelings They're tellin' me life lines never change I believe in karma and I believe in you And I feel somehow you believe in me too

I was made to love you Love you, love you alone I was made to love you Love you, love you alone

I was made to love you Love you, love you alone I was made to love you Yes, I was made to love
