

# Simulator

Gaz Coombes

An attack a computer vision, alter ego, strange attractor  
An escape to a new dimension, now the wheels are turning faster  
Going blank like a generation, all this grief and all this trouble  
In the thick of the tunnel vision, all my faith in your resistance

I'm a witness  
And I'm a simulator  
Keep your head down  
Work it out, work it out  
I'm a simulator

In the back of the free edition all my people want it equal  
In the war that will never end they want to make you come to take you  
In the wake of a holy mission everyone will fear no other  
Get the power of the information, motivation stick together

I'm a witness  
And I'm a simulator  
Keep your head down  
Chew em up, spit it out  
I'm a simula - I am a simulator  
I'm gonna work it out (gonna work it out)

I'm a witness  
I am a simulator  
Keep your head down  
Work it out, work it out  
I'm a simulator

An attack a computer vision, alter ego want to reboot  
In the war that will never end they want to make you come to take you  
In the wake of the holy mission everyone will fear no other  
Get the power of the information, motivation stick together

I'm a witness  
And I'm a simulator  
Keep your head down  
Chew em up, spit it out  
I'm a superman  
I am a simulator  
I'm gonna work it out
