

# The Girl Who Fell to Earth

Gaz Coombes

The girl who fell to earth  
She gets her kicks from science  
It's hard to see, it's not enough  
When you're blinded by computer love  
So tear it down and play it rough  
You don't mean to mess it up  
How I wish we could start over  
You wear your elastic heart on your chewed up sleeve  
First you cry and then you laugh  
You're like a circle, cut in half  
Another night of broken sleep  
I'll comfort you, I'll warm your dreams  
But you've still got time, my warrior child  
When the storm starts it's only on the outside  
At times we couldn't see the light  
We only wipe our tears dry  
I know you're there, I know it's you  
The girl inside is breaking through  
The girl who fell to earth
